

# SARKARI RESULT

## WordPress Theme — Install & Handover Guide

Theme version 1.0.0 | Website: sarkariresult.edu.pl  
Safe for existing posts, pages, categories & Yoast SEO

|             |                                                   |
|-------------|---------------------------------------------------|
| Folder      | sarkariresult-theme/                              |
| Requires    | WordPress 6.0+ · PHP 7.4+                         |
| Recommended | Yoast SEO                                         |

| Branch / PR | cursor/sarkariresult-wordpress-theme-2f60 · PR #1 |

This guide explains how to install and configure the theme on the live site without changing existing content, URLs, or Yoast metadata.

## 1. Critical safety rules

This theme is designed for a production site with existing content (~321 posts). It performs zero database migrations on activation.

- Does **not** delete or modify posts, pages, categories, or tags
- Does **not** change slugs or permalinks
- Does **not** alter Yoast SEO titles, descriptions, canonicals, schema, or sitemaps
- Does **not** create duplicate Analytics or AdSense scripts when plugins already inject them
- Legal pages load dynamically from WordPress (About, Contact, Privacy, Disclaimer, Terms)

## 2. Installation steps

- Upload the folder **sarkariresult-theme** to **wp-content/themes/**
- In WordPress Admin go to **Appearance** → **Themes** and Activate **Sarkari Result**
- Go to **Appearance** → **Menus** and assign a menu to **Primary Menu** (and optionally Footer)
- Go to **Appearance** → **Customize** → **Sarkari Result Theme** for branding, homepage, ads, analytics
- Optionally add widgets under **Appearance** → **Widgets** (Main Sidebar, Footer columns)

**Tip:** Recommended Primary menu items: Home, Latest Jobs/Recruitment, Results, Admit Card, Answer Key, Syllabus, Time Table, Board Results.

## 3. Customizer settings map

| Section                      | What you can control                                                                                                                                             |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Branding &amp; Colors</b> | Header subtitle, homepage H1/intro, primary / secondary / accent colors                                                                                          |
| <b>Homepage Sections</b>     | Show/hide Latest, Sarkari Result, Recruitment, Admit Card, Answer Key, Board/University Results, Exam Date, Time Table, Syllabus, Scholarship; posts per section |
| <b>Article Options</b>       | TOC, Related Posts, Author Box, theme breadcrumbs fallback, disable emoji scripts                                                                                |
| <b>Footer Content</b>        | About text (includes ownership/team copy), optional newsletter embed HTML                                                                                        |
| <b>Social Links</b>          | Facebook, Telegram, Instagram, YouTube, X/Twitter — only configured URLs display                                                                                 |
| <b>Analytics</b>             | GA4 Measurement ID (default G-LKE1MH72PR). Skips if Site Kit / MonsterInsights detected unless forced                                                            |
| <b>AdSense</b>               | Publisher ID + enable/code for header, intro, article top/middle/bottom, sidebar, footer, homepage                                                               |

## 4. Yoast, Analytics & AdSense

### Yoast SEO

- Theme uses **add\_theme\_support('title-tag')** — Yoast owns SEO titles

- No theme meta description, canonical, Open Graph, Twitter Card, or JSON-LD Article schema
- Breadcrumbs: prefers Yoast breadcrumbs when enabled; otherwise optional theme crumbs
- XML sitemap remains Yoast-controlled

## Google Analytics 4

- Default ID: **G-LKE1MH72PR** (editable in Customizer)
- Theme injects gtag only if no analytics plugin is detected
- Leave Measurement ID blank to disable theme GA entirely

## Google AdSense

- Publisher ID configurable (default ca-pub-3078934234879441)
- adsbygoogle.js loads **once** only
- Each placement independently enabled with its own ad unit HTML
- Reserved min-heights reduce CLS; placeholders show only in Customizer preview

## 5. Theme structure (key files)

| Path                              | Purpose                                   |
|-----------------------------------|-------------------------------------------|
| style.css / functions.php         | Theme header + bootstrap includes         |
| front-page.php                    | Homepage with dynamic category sections   |
| single.php + content-single.php   | Article layout, TOC, ads, related, author |
| category.php / archive.php        | Category & date/tag archives              |
| search.php / author.php / 404.php | Search, author, not-found                 |
| inc/customizer.php                | All admin settings                        |
| inc/ads.php / analytics.php       | AdSense + GA4 guards                      |
| inc/template-tags.php             | Breadcrumbs, meta, TOC, related query     |
| assets/css/main.css               | Mobile-first styles + CSS variables       |
| assets/js/main.js                 | Menu, search, TOC toggle, back-to-top     |

## 6. Homepage & content behaviour

- Compact hero: configurable H1 (default “Sarkari Result 2026”) + short intro
- Latest Updates uses WP\_Query of recent posts
- Category blocks resolve by slug (fallback by name); empty/missing categories are hidden
- Single posts use **the\_content()** — never replaces article HTML in the database
- Tables auto-wrapped for horizontal scroll on mobile
- TOC generated on output from H2/H3 (no permanent DB heading changes)
- Related posts: same category → tags → recent (excludes current post)
- Footer copyright year is dynamic (**gmdate('Y')**) — not hardcoded

## 7. PDF & download links (content styling)

Sarkari Result posts often include Official Notification / Admit Card / Result PDF links. The theme styles Gutenberg buttons and common download link patterns. It does **not** invent PDF URLs — only styles links already present in post content.

- Gutenberg Button blocks render as high-contrast CTA buttons
- Links ending in **.pdf** receive a clear download-style treatment
- Important Links / notice box classes: `.info-box`, `.warning-box`, `.success-box`, `.danger-box`
- Embedded PDFs / media remain handled by WordPress / plugins

## 8. Go-live checklist

- Theme activates without PHP errors (WP\_DEBUG recommended on staging first)
- Sample of existing posts: titles, tables, images, buttons, categories intact
- Existing URLs still resolve (no redirects introduced by theme)
- Yoast title / description / canonical unchanged in page source
- Only one GA4 config and one adsbygoogle.js in source
- Mobile: no horizontal overflow; tables scroll inside wrapper
- Primary menu works on desktop + keyboard-accessible mobile menu

- Footer legal links point to existing pages (privacy-policy-2, disclaimer, terms-conditions, contact-us)

## 9. Ownership footer text (preserved)

---

Default footer About text preserves the live-site ownership/team wording (Gaurav Gupta; team: Vijay Kumar, Neeraj Kumar Gaur, Yogendra Gupta, Praveen Kumar Khare). Editable anytime under Customize → Footer Content.

---
